FLOWERS ARE GOOD FOR YOUR BUSINESS

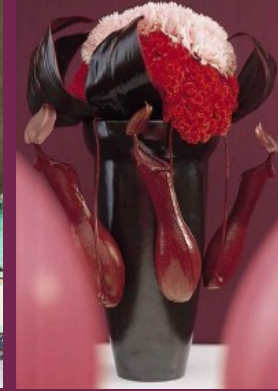

FIRST IMPRESSIONS COUNT

A positive first impression and a warm welcome will directly affect the health of your business.

No matter what you wish to say, flowers can say it for you. They create an atmosphere and make a statement that words can not equal.

We create exceptional designs exclusively tailored to meet the needs of individual businesses. Specialists in creative and commercial floristry, we understand the needs of our clients as well as the world of flowers.

IMPROVE PRODUCTIVITY

As we depend more and more on technology, flowers and plants in an office bring nature indoors. Science proves they are not only good for our health but improve the working environment and increase performance levels and staff morale.

We can also arrange gifts for any occasion, whether it's to let your staff or client know how important they are or a special celebration. We can arrange local, national and international delivery of a wide range of gifts six days a week.

WHAT CAN FLOWERS DO FOR YOUR BUSINESS?

- Create a positive and warm impression
- Improve the presentation of your offices and meeting rooms
- Enhance and promote your corporate identity
- Improve the environment and productivity
- Distinguish you from your competitors
- Flowers say you're good people to do business with
- Excellent gift for the perfect thank you.

Without doubt, the effect the presence of flowers have on a business are hugely positive. The benefits will far outweigh the cost, all of which are 100% tax deductible.

Contact us for a non obligation visit and quotation and see how we could work together.
